Director: Prof. Manisha Verma, Dean, Faculty of Education (9413193708)

Convener: Dr. Sarita Sharma, (Reader-CTE) (9413193303)

Co-convener: Dr Kailash Pareek, Assistant Professor, Faculty of Education (9413889171)

Introduction :

Faculty of Education, Institute of Advanced Studies in Education (Deemed to be University) GVM Sardarshahr is organizing a Faculty Development Program (FDP) on Development of E-Content. As all of us are aware about the pandemic situation being faced by the whole world, which has adversely affected most of the activities of day to day life, including the academics. The severity of this situation is varying from city to city and state to state. The 21st century is of digital native. In this era, Pedagogy, Transaction and Evaluation along with Flip class rooms Approach are equipped with technological supported pedagogical innovations. Digital skills and competencies will always be the ground which education of 21st century will grow and thrive. So this is the need of the hour that teachers should focus on digital competence to explore new pedagogical innovations and new endeavours of Research methodology. Educational needs of learners are changing faster than teachers can cope up with. We teachers have to welcome technology into our class rooms equipping students with new experiences.

About The FDP:

Necessity is the mother of all inventions and likewise crisis may give rise to an innovation. The unprecedented pandemic situation has paved the gateways to a digital age where most of the academic and non-academic institutions have gradually switched to "work from home" mode. E-learning has become not only significant, but a necessity and is rapidly gaining momentum. With the Government of India aiming at digitizing India with its "Digital India" Initiative, academic institutions are also gearing up towards imparting knowledge to the students as well as teachers to attain this objective.

The content and its quality are key components of a robust teaching-learning system. It is proposed to create high quality, curriculum-based, interactive content in different subjects across all disciplines. E-Content, so developed would be available on open access through a dedicated Learning Management System.

Development of e-content is a specialized job requiring skills of a video producer, web designer and instructional designer. However, a faculty or a scientist involved in teaching and research is perfectly suitable and capable of preparing basic materials that can be transformed into e-content with intervention of web designer and professionals with ICT skills. This document is designed to guide content writer to write an e-content module for a given paper along with description of multimedia contents and instructions to graphical designer/animator.

This faculty development program is being organized to develop skills which are essential for preparing and presenting E-content through provide practical experiences to the participants.

THEMES

E-Library Resources and tools for teaching
Create docs, forms, sheets, slides, and personal websites
Create interactive e-content using open-source software tools.
Design animated audio-video lectures and quizzes.
Creation & editing of videos using open-source software tools.
Develop and share e-content with inbuilt assessment and feedback mechanisms.
