About the University

The Institute of Advanced Studies in Education (Deemed to be University) has a proud past stretching back to 1950 when the petite Gandhi Vidya Mandir, parent Institution, was established in the midst of rural barren desert land Sardarshahr. From its inception with handful of students, the institution slowly grew into a giant tree which at present imparts education from primary to post-doctoral level. It has survived many ups and downs and emerged as a private university in 2002, where it got the formal recognition of Deemed to be University, under section 3 of the UGC Act 1956. Today, the university is a vibrant centre in research and academics as it embraces its root as a value-based institution. The Institute of Advanced Studied in Education (Deemed to be University) (hereafter IASE) is an institution born out of dedication of the founder Shri Kanhaiyalal Dugar (Swami Shri Ramsharan Ji Maharaj).

He was an embodiment of universal humanism with higher vision and dedication. His vision was inspired by Mahatma Gandhi and he believed in non-violence and universal brotherhood. He had dedicated entire life for betterment of society, expansion of education and for upliftment of the downtrodden in Sardarshahr. This includes Arts, Social Science, Humanities, Science, Education & Pharmacy. Right since its inception the vision of the institute has been to impart quality education inculcate moral value and to be good and sensible citizens.

About the FDP

In the contemporary educational landscape, rapid advancements in digital technologies, particularly Artificial Intelligence (AI), are significantly transforming teaching, learning, and research practices. However, a considerable gap exists between the availability of these advanced technological tools and their effective utilization by educators in academic institutions. Many faculty members face challenges in integrating AI into pedagogy, research methodologies, and data analysis due to limited exposure, lack of training, and insufficient technical expertise. This gap has led to underutilization of innovative teaching strategies, reduced efficiency in research processes, and limited adoption of data-driven decisionmaking in education. Therefore, there is a pressing need to build the capacity of faculty members by equipping them with practical knowledge and skills related to AI applications in education and research. The proposed FDP aims to address this need by providing a structured platform for learning, interaction, and skill development.

Objectives of the Programme

- Develop a comprehensive understanding of Artificial Intelligence and its applications in education.
- Enhance faculty competencies in using AI tools for teaching, assessment, and content development.
- Provide exposure to AI-assisted research methodologies, including literature review, data analysis, and academic writing.
- Strengthen the use of statistical and analytical techniques in educational research.
- Promote data-driven and technology-enabled pedagogical practices
